CLEAN UP FEED LOTS AND BARNYARDS

Complete farm clean-up includes destroying all corn refuse around or in yards and buildings.

Haul refuse to field and burn, using oil if necessary—haul in tight racks or manure spreaders.

Shred or run through silage cutter into one-half inch pieces or smaller to kill borers.

Use shredded material for fertilizer, if desired.

(1) Haul direct to field.

(2) Haul direct to pasture or meadow for top dressing.

(3) Store in manure pit to rot.

Never spread shredded or whole stalks on plowed fields.

CLEAN UP FEED LOTS AND BARRIERS

The following information is for the use of the
operator of the feed lot and the person who
is responsible for the maintenance of the
barriers. It is the responsibility of the
operator to keep the feed lot and the
barriers clean and free of debris. The
operator should also keep the feed lot and
the barriers free of any material that
may be harmful to the animals. The
operator should also keep the feed lot and
the barriers free of any material that
may be harmful to the animals. The
